Active Ingredients

Sheep Placenta

Placenta extract is rich in bioactive nutrients that provide intense hydration whilst reducing skin inflammation and irritation, reinforcing the skin's natural barrier, and accelerating its wound healing process.

Malus domestica Extract

A liposomal active ingredient derived from apple stem cells promotes the skin stem cells' vitality and longevity. It protects the skin from damage caused by environmental stress, hence delays the skin aging process.

Hyaluronan

Hyaluronan is a glycosaminoglycan that is vital for skin rejuvenation and hydration. It can hold moisture and revitalize the skin's surface for softer, smoother, and radiantly hydrated skin. Due to its capacity to retain large amounts of moisture, it also reduces the appearance of existing wrinkles and prevents new wrinkle formation caused by dry skin.
